

What Boring Solutions we discussed today.

We Focused on Implementing Critical Security Controls 1-10

We started with knowing what is in our environment, then progressed to discover what is installed, how it is configured, and what it is doing.

We then looked at the unique challenges of protecting email and browsers, we explored malware defenses, profiling the data flow and ports used by systems, and looked at recovery methods.

Events

Cyber Security Summit
October 28-30, 2019
