What are we going to cover tonight?

Most organizations are using the "shovel money at the security problem" approach. Tonight we'll discuss alternatives.

What are we going to cover tonight?

Most organizations are using the "shovel money at the security problem" approach. Tonight we'll discuss alternatives.

To start, if you can rebuild I.T., do it.

Before we talk about some Boring Solutions that can improve your security posture, I do have one not-boring thing that I think people need to hear. Everything reaches a point where it is more costly to address the maintenance debt in a high friction environment, then it is to burn it all to the ground and rebuild. So, if you have the opportunity (and of course management and peer buy-in) to burn it all to the ground and rebuild programmatically - **PLAN IT, TEST IT, DO IT!**
