Assume the worst

CSC 10: Data Recovery Capabilities

What will you need to recover from?

Ransomware? Drowned mobile?
Employee abandonment?
Stolen laptop? Regulatory Compliance?

SpiderOak One Backup Code42's CrashPlan

What Boring Solutions we discussed today.

We Focused on Implementing Critical Security Controls 1-10

We started with knowing what is in our environment, then progressed to discover what is installed, how it is configured, and what it is doing.

We then looked at the unique challenges of protecting email and browsers, we explored malware defenses, profiling the data flow and ports used by systems, and looked at recovery methods.
